

1200 SHREDDING MACHINE

About Us

NANJING SHANDUAN CNC MACHINE TOOL CO.LTD is a leading manufacturer of industrial shredder and waste disposal equipment in China.

With a growing market and thousands of successful cases we had built, YSDCNC shanduan had become the most trustworthy brand in China, also it's being more popular worldwide. Thanks to rich experience and our strong R&D team, YSDCNC always keeps advance in technologies.

YSDCNC supplies competitive shredding machines worldwide, including single shaft shredder, double shaft shredder, quad shaft shredder, primary shredder and mobile shredder, We also offer a wide range of one-step solutions such as MRF system for MSW, SMP system for hazardous waste, tires, old batteries shredding disposal system for organic waste, paper mill waste and bulky waste, etc.

Serial number	Name	Specification/Model	Quantity	Material	Remark
1	Blade	400*40/50(mm)	25/20	55CrSi	Blade: close-toothed shape
2	Spacer	250*40.5/50(mm)	25/20	40Cr	Tempering
3	Axis	1550*220(mm)	2	42CrMOV	Straightening
4	Bearing	170*280*88(mm)	4	NSK	Seiko
5	Chassis dimensions	Length 1000*width 750*height 450(mm)			The chassis wall panels are welded by 45 pieces of carbon steel
6	Motor	37 KW Class 6	2	Copper wire	Nanjing Chaoli
7	Reducer	ZSY315 reducer	2	Hard tooth surface	Jiangsu Xiangwei
8	Motor box	PLC Guoyou digital display screen	1	Tracy	With auto reverse function
9	Machine Dimensions	4200*1980*2400(mm)			Square steel welding

Wooden case packaging

Features

1. The frame plate is thick, can resist high torque, and is very strong.
2. Microcomputer (PC) automatic control is adopted, with start, stop, reverse and overload automatic reverse control functions.

Performance Notes

- Crusher main body: The main body of the equipment is welded with high-quality steel plate to eliminate stress treatment/integral machining to ensure the stability of the equipment under heavy load for a long time.
- Cutter shaft: It is processed and refined with high-strength and heavy-duty special steel, and it is more reasonable to cooperate with the tool to provide powerful power for cutting.

Main uses

Kitchen waste: Rotten vegetables, dead fish, chicken bones, burnt beef, etc...

Iron materials: plastic switches, plugs, iron signs, etc...

Plastic products: beverage bottles, detergent bottles, Coke bottles, etc...

Paper/Wood Products: cartons, milk cartons, etc...

Articles for daily use: zipper, wire, rice cooker, etc...

Other supplies: Tires, oil drums, etc...

Standard configuration

BLADE

Blade quality include 9CrSi, Cr12MoV, SKD-II, D2 etc. Can be customized according to customer.

SHRED CHAMBER

Shred chamber plate is very thick, can resist high torque.

WELL-KNOWN APPLIANCES

Controlled by PLC control system; the blade can reverse automatically to protect the machine when overload.

PROFESSIONAL

We design single or multi-hooks of blades with different thickness for different materials.

EASY MAINTENANCE

The bearing seat adopts the split type, easy to maintain and replace the blade.

Blade options

more than 20 options, welcome to contact

Standard

Fine and dense,

smaller output

Square knife
